

Event/Film Industry Forecasting

- Precise site- and time-specific forecasts
- Medium-range (4 to 10-day) forecasts
- Site climatology development for long-range planning
- On-site "Nowcasting"
- Exact sunrise/sunset data
- General weather consultations
- Forecasts available via phone, fax, e-mail or FTP transfer

Meteorological Solutions Inc. staff can provide the motion picture and television production industries with accurate, site-specific, short-term forecasts tailored for your schedule, and can provide medium-range forecasts (4 to 10 days) which can be used for planning purposes. For periods beyond ten days, MSI can develop a climatology for any specific location to provide you with information on normal weather conditions. When your needs dictate, MSI can provide an on-site meteorologist to monitor weather conditions and provide "Nowcasts" to assist you in making critical decisions. We are also available for consultation on weather matters as they relate to your film's story line.

If you are looking for specific weather conditions for your shoot (snow, fog, rain, etc.), MSI can alert you to the time when these conditions will likely develop. Correct decisions based on good weather information can save you time and money. However the weather affects your schedule, MSI is able to help you prepare for, or make successful use of the predicted weather.

Event/Film Industry Forecasting

Meteorological Solutions Inc. meteorologists are professionals who are skilled in weather forecasting. MSI will provide you with the most accurate and detailed site and/or time-specific weather forecasts available allowing you to make better, more informed decisions. Forecast costs are based on the number of forecast days and sites, not on the number of forecasts issued. Forecast parameters include temperatures, precipitation, winds, sky conditions and many others. Forecasts available four days in advance of the day(s) of interest. Forecasts issued by 10 A.M. Mountain Time and can be sent via phone, fax, e-mail or password-protected FTP transfer.

Forecasting costs for single site:

- 1 to 6 days: \$50 per day
- 1 to 3 weeks: \$200 per week
- 4 or more weeks: \$150 per week
- 1 year or more: \$7000 per year
- Site Climatology: Call
