

Ambient Monitoring

- Monitoring plan development
- Equipment installation and calibration
- Data management and validation
- Reporting in state and EPA formats
- Air toxics sampling of mobile, industrial and biogenic sources using canister VOC, carbonyl cartridge and EPA TO methods
- Automated computer programs for data evaluation and validation
- Remote interrogation of stations
- Continuous monitoring of criteria pollutants and particulate matter (PM₁₀, PM_{2.5})
- Meteorological and air quality system and performance audits
- EPA-approved methods
- NIST-traceable reference standards
- Monitoring and quality assurance plans

Our professionals provide a full range of monitoring services from design and setup to routine operations, data validation and reporting. Meteorological Solutions Inc.'s goal is to offer you technically excellent, cost-effective monitoring systems designed to meet your specific requirements. We provide the latest customized software packages for data monitoring and retrieval. We recommend and install only proven and reliable instrumentation. For pictures of ambient monitoring systems please visit our project image page.

Ambient Monitoring

MSI's QA/QC programs are designed to ensure that your monitoring data meet EPA and state requirements for completeness, representativeness, precision and accuracy. Our experienced auditors conduct meteorological and air quality performance and system audits using EPA guideline methods and NIST-traceable reference standards. We offer customized software for automated data evaluation and validation to identify monitoring problems quickly and reduce data loss.

Often monitoring data is collected for the purposes of modeling the effect of pollutant emissions on the surrounding area. MSI's modeling staff has been assisting clients in applying dispersion models in the United States and interactively for over 20 years. All MSI modelers are meteorologists and have the technical knowledge to perform modeling analyses for continuous, non-continuous, and accidental releases.
